10. Handling and use precautions

- 1) For over-current protection, we recommend the use of resistors to prevent sudden current surges caused by slight shifts in voltage.
- 2) LEDs should not be contacted to any type of fluid (i.e. water, oil, organic solvent, etc.). If cleaning is required, only use isopropyl alcohol.
- 3) The maximum ambient temperature must be considered in order for the maximum temperature ratings not to be exceeded.
- 4) LEDs must be stored in a clean environment. If the LEDs are to be stored for 3 months or more after being shipped from Samsung Electronics, they should be packed by a sealed container with nitrogen gas injected. (Shelf life of sealed bags: 12 months, temp. $\sim 40^{\circ}\text{C}$, $\sim 90\%$ RH)
- 5) After storage bag is open, LED subjected to soldering, solder reflow, or other high temperature processes must be:
 - a) Mounted within 672 hours (28 days) at an assembly line with a condition of no more than 30°C / 60% RH.
 - b) Stored at $<10\%$ RH.
- 6) Repack unused products using anti-moisture packing, fold to close any openings and store in a dry place with $<10\%$ RH
- 7) LEDs require baking before mounting, if humidity card reading is $>60\%$ at $23\pm 5^{\circ}\text{C}$.
- 8) If baking is required, LEDs must be baked for 1 day at $60\pm 5^{\circ}\text{C}$.
- 9) LEDs are sensitive to electrostatic discharge and surges. Applying any voltage exceeding the absolute maximum rating of the LED can cause permanent damage to the device. Damaged LEDs may have some unusual characteristics such as increased leakage current, lower turn-on voltage or may light abnormally at low current. When handling LEDs, using grounding wrist-bands or anti-static gloves is recommended.
- 10) VOCs (volatile organic compounds) present in adhesives, flux, hardeners or organic additives, etc. that are used in luminaires may lead to discoloration of the LED when exposed to heat or light. Note that VOCs can permeate silicone bags. This phenomenon can significantly affect light output from the luminaire. To avoid this issue, please carefully evaluate materials used in your process and/or luminaire to be free of VOCs.
