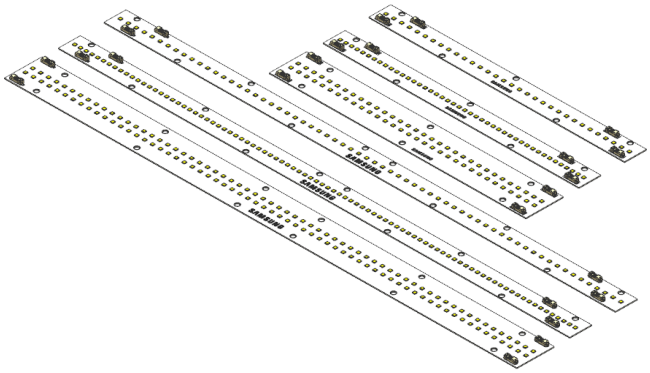
LED Module

H inFlux



Features & Benefits

- Excellent solution for highbay, lowbay and high mounted fixtures
- Very high efficacy delivery around 190lm/W @ 4000K, tp=55℃
- Additional LED protection effort
- Wide lumen flux coverage up to 40,000lm through module combination
- Easy thermal management by flip-chip MPL designed by Samsung

Applications

- Industrial lighting : warehouse, plant, parking lot etc.
- High ceiling indoor : building lobby etc

Notes:

* Temperature used to specify performance of the module (tp).

** Rated maximum performance temperature at which lifetime is specified.

*** Rated maximum temperature, highest permissible temperature to avoid safety risk (tc).

All temperatures are measured at the designated “Tc point” as indicated on the module.

Please use heat-sink(or heat dissipation solution) with proper thermal capacity(operating wattage).

f) Thermal mearsurement

Performance temperatures are measured on “Tc point” as indicated on the module.

7. Precautions in Handling & Use

1) This LED Module should not be used in any type of fluid such as water, oil, organic solvent, etc. When washing is required, IPA is recommended to use. When using other solvents it should be confirmed beforehand whether the solvents may react with the Module material. The banned freon solvents should not be used. Do not clean using ultrasonic cleaner.

2) The LEDs are sensitive to the static electricity and surge. It is recommended to use a wrist band or anti-electrostatic glove when handling the LED Modules. If voltage exceeding the absolute maximum rating is applied to LEDs, it may cause damage or even destruction to LED devices. Damaged LEDs may show some unusual characteristics such as increase in leak current, lowered turn-on voltage, or abnormal lighting of LEDs at low current.

3) VOCs (Volatile Organic Compounds) can be generated from adhesives, flux, hardener or organic additives used in luminaires (fixtures). Transparent LED silicone encapsulant is permeable to those chemicals and they may lead a discoloration of encapsulant when they exposed to heat or light. This phenomenon can cause a significant loss of light emitted (output) from the luminaires (fixtures). In order to prevent these problems, we recommend users to know the physical properties of the materials used in luminaires, and they must be selected carefully.

4) Risk of sulfurization (or tarnishing)
The LED uses a silver-plated lead frame and its surface color may change to black (or dark colored) when it is exposed to sulfur (S), chlorine (Cl) or other halogen compound. Sulfurization of lead frame may cause intensity degradation, change of chromaticity coordinates and, in extreme cases, open circuit. It requires caution. Due to possible sulfurization of lead frame, the LED Modules should not be used and stored together with oxidizing substances made of materials such as rubber, plain paper, lead solder cream, etc.

5) The resin area is very sensitive, please do not handle, press, touch or rub it.

6) Do not drop the Module or give shocks.

7) Do not store the Module in a dusty place or humid location.

8) Do not disassemble the Module.

9) Do not directly look into the lighted LED with naked eyes for a long period of time.

10) Please consider the creepage and clearance distance at the end product.

	8	Bin Group No	01

a-3) Tray Label Barcode Information

Barcode	No	Item	Remark
SL-B8T1N30LAWW	1	Product code (DVC)	SL-B8T1N30LAWW
20180101-D0001	1	Tray Lot No.	20180101-D0001

a-4) Outbox Label Barcode Information

Barcode	No	Item	Remark
SL-B8T1N30LAWW	1	Product code (DVC)	SL-B8T1N30LAWW
E141285816	1	Outbox Lot No.	E141285816

a-5) Pallet Label Barcode Information

Barcode	No	Item	Remark
DW7B265001	1	Pallet Lot No.	DW7B265001

2. Applicable Solid Wires

a) Strip details

Wiring method	Push In
Cross section [solid]	0.2-0.75mm^2
Cross Section [AWG]	24-18
Strip length	8.0 ±1mm
Conductor entry angle to the PCB	0 °

※ outside insulation diameter Φ2.1mm Max.

b) Material details

Temperature stability	-40°C ~ +105°C
Flammability category, based on UL94	V0
Insulating material group	I
Insulating material	PPA-GF

c) Important processing notes

Depending on the SMD soldering process and associated parameters a minor discoloration might occur.
However, this will not influence the functionality.
